THE SCIENCE CAMP

Our Extra Curricular Activities

Science Clubs

- Hands-on experiments
- Physics & Science Legends
- Human anatomy & Engineering

Coding Clubs

- Mini Coders
- Beginners
- Next Gen Tech

Sensory Lab

- Sensory Play
- Mindfulness

At The Science Camp, we believe every child is a natural scientist. Through hands-on experiments, creative challenges and playful exploration, we make science and technology accessible, exciting and fun.

Science Clubs

Making science hands-on, exciting and accessible, tailored to any age.

4 - 7 jaar

Science through fun, hands-on experiments. Children explore, investigate and learn through play, sparking curiosity about the world around them.

8 - 11 jaar

Explore exciting topics through structured experiments in chemistry, physics, biology, the human body and technology. Children develop scientific thinking.

Coding & Technology Club

From logical thinking to programming and AI. Building skills step by step.

Mini coders 4 - 7 jaar

A playful introduction to the world of coding, mostly through screen-free activities. Computational thinking skills.

Code & Create 8 - 12 jaar

Children learn the basics of coding through visual programming and creative challenges.

Next Gen Tech 8 - 12 jaar

For who is ready for a challenge! Explore different programming languages and problem-solving.

Sensory Lab

Young children explore, experiment and learn through their senses.

4 - 7 jaar

A multi-sensory journey of discovery! Children explore textures, colours and reactions through hands-on activities that encourage observation, experimentation, creativity and mindfulness.
